

# Naval Surface Warfare Center (NSWC) Indian Head Division (IHD) Battle Lab Overview

Presented by:

**Ken Poe**

Director, Battle Lab Division

Distribution Statement A (24-159): Approved for public release; distribution is unlimited.

## The State of Technology

No Smartphones

Slow Internet

### -As it relates to the "Warfighting Technology World" -

(Source: Maddyz. "Girl Is Holding Hand Retro Flip Flop Mobile Phone." Adobe Stock, <https://stock.adobe.com/images/girl-is-holding-in-hand-retro-flip-flop-mobile-phone/140360029>, accessed on 25 October 2024.)

(Source: Africa Studio. "Obsolete Computer Set on Light Blue Background." Adobe Stock, <https://stock.adobe.com/images/obsolete-computer-set-on-light-blue-background/91601862>, accessed on 25 October 2024.)

- Long acquisition wait times were okay.
- Timelines were similar to now, but the speed of information was slower.
- It was relative to the time/state of technology.

# Around 2005—Turning Point

## WAR ON TERROR

### THREAT

Types of threats were changing quicker than ever.

Little background information was available on new threats.

(Source: Kimmons, S. "Sappers Become IED hunters in Iraq (Image 1 of 6)." DVIDS, <https://www.dvidshub.net/image/2126/sappers-become-ied-hunters-iraq>, 16 November 2004.)

### -The Impact to the Warfighting Technology World-

The need to address new threats, and quickly, meant that the commercial market for equipment to make technology solutions readily available for the warfighter **grew enormously**.

However, many of these systems were **untested and not evaluated** before purchase.

# User-Experience Examples

Disclaimer: Not all issues are exclusive to one user group; these are fictional examples.

**Military EOD**  
Location: Foreign Country

## Scenario

Roadside unexploded ordnance. Only equipment is a robot, suit, and handheld x-ray. Kit only detects, not identifies. **Need to identify target internals to safely dispose.**

Mission Need

**THERE WERE LONG WAIT TIMES FOR NEW EQUIPMENT**

**Border Security**  
Location: U.S. Border

## Scenario

Partially buried item of interest in an embankment. Robot and handheld system unable to **access improvised explosive device for necessary information.** Approach in bomb suit.

Mission Need

**EQUIPMENT DID NOT MEET THE OPERATIONAL NEED**

**Law Enforcement**  
Location: Major U.S. City

## Scenario

Major sporting event with thousands of people and locations within stadium. **Need to identify, interrogate and render safe, quickly and efficiently.**

Mission Need

**EQUIPMENT DID NOT PERFORM AS EXPECTED**

(Source: Greenwood, N. "Demolition Range—EOD Marines Train the PNTL EOD Team." DVIDS, <https://www.dvidshub.net/image/7518683/demolition-range-eod-marines-train-pntl-eod-team>, 27 October 2022.)  
Distribution Statement A (24-159): Approved for public release; distribution is unlimited.

# Understanding the Issue

- User Experience

**THERE WERE LONG WAIT  
TIMES FOR NEW EQUIPMENT**

**Solution Not Relevant  
to Current Threat**

**EQUIPMENT DID NOT MEET  
THE OPERATIONAL NEED**

**Continued Use of Old  
Tools and/or Lacking  
Capability Altogether**

**EQUIPMENT DID NOT  
PERFORM AS EXPECTED**

**Information  
Disconnect**

- Major Takeaways

1. Long acquisition and science and technology (S&T) development timelines
2. Requirements not delivering desired outcomes
3. End user not involved early and often to provide feedback on operational suitability

# Addressing the Issue

## Technical Perspective

THERE WERE LONG WAIT  
TIMES FOR NEW EQUIPMENT

What can we do to get  
technology out the door faster?

EQUIPMENT DID NOT MEET  
THE OPERATIONAL NEED

How do we better understand  
the user's requirement?

EQUIPMENT DID NOT  
PERFORM AS EXPECTED

How can we communicate the capabilities and  
limitations of equipment to stakeholders?

**Battle Lab plays a key role in identifying and evaluating solutions.**

# Who and What Is Battle Lab?

## Independent Assessor of Warfighting Equipment and Technology

- Provide objective reviews of equipment and technology being considered, customized to sponsor time and budgetary constraints
- Have operational and technical subject matter experts (SMEs) available:
  - Military experienced
  - Scientists and engineers
- Serve as a warfighter advocate
- Have technical reach-back support

### Sponsors

Provide a cycle of equipment review and evaluation to feed capability gap assessment, equipment-buying decisions, and technology implementation and inform requirements development **at the speed of relevance.**

# How Is Battle Lab the Solution?

## Independent Assessors for Warfighting Equipment and Technology

What can we do to get technology out the door faster?

How do we better understand the user's requirement?

How can we communicate the capabilities and limitations of equipment to stakeholders?

# How We Operate

## Identify

- Facilitation of threat assessments
- Warfighter workshops
  - Develop concept of operations and measures of effectiveness/suitability/performance
- Opportunities for replacement of existing kit with new technology

## Scout

- Traditional request for information
- Outreach through SMEs and partners
- Warfighters
- International partners
- Trade shows

(Source: NSWC IHD.)

# How We Operate (continued)

## Evaluate and Assess

- Technical
  - Capability and limitations assessments
  - Cybersecurity evaluations
  - Specification sheet verification and validation
- Operational
  - Operational events with user participation and feedback
  - Mission-based events to evaluate how emerging technology can be integrated into current mission sets

Events are hosted at our local test facilities or at a site convenient to the sponsor, user, or technology.

# Electronic Data Assessment Tool (E-DAT)

## E-DAT

### All-in-One Ruggedized Offline Field Data Collection Kit

- Customized form development
- Onsite collection, analysis, and reporting
- Offline environment
- Multiple mobile collection devices

#### Survey Examples

- Sign-in rosters
- Demographic
- Technology
- Training

#### Analytics Tool

- Weighted questions
- Advanced stats
- Graphing

#### Reporting Tool

- Rapid turnaround time
- Metrics
- Custom reports

# What We Provide

## Feedback

- ➔ Stakeholders receive data to make decisions on equipment strategy/procurement.
  - ➔ Technical results fed back into gap analysis/used to target future development.
  - ➔ Developers receive results for only their system.
- 
- ⬆ EOD-relevant results uploaded on Joint EOD portal (sponsor dependent).
  - ⬆ Techlook pages created (where appropriate) and uploaded.

Snapshot of the technology tested

**Hammer .50**  
Umarex

**System Description**  
Commercial air rifle designed for big game hunting requires compressed air, or external air supply for tank purchase price. Umarex offers its own branded air compressor.

**Event Description**  
This was a limited assessment. Data collection was limited. Large caliber air rifles provide a potential operational risk.

**Capabilities Summary**  
Using the kinetic energy as a baseline, the Umarex Hammer meets the manufacturer's claims for the majority of pellets fired. The Hammer has the capability to fire a 550 grain projectile at 700 feet per second creating a kinetic energy of 590 ft/lbs. The Umarex Hammer has the capability to penetrate a 0.125-inch thick 6061 flat aluminum plate.

TECHNICAL DATA

Penetration Capability		
Grain Weight	Penetration	Penetration
275 Grain Lead Pellet	0.125 in	Not Tested
350 Grain Lead Pellet	0.125 in	Failed 0.125 in
550 Grain Lead Pellet	Not Tested	Failed 0.125 in

Velocity		
Grain Weight	Velocity	Velocity
275 Grain Lead Pellet	945 fps	909 fps
350 Grain Lead Pellet	875 fps	830 fps
550 Grain Lead Pellet	750 fps	664 fps

Accuracy (Dispersion of 3 Shot Group)		
Dispersion	Penetration	Penetration
Minimum	0.6 in	550 Grain Lead
Maximum	1.1 in	350 Grain Lead

\*All an interior partition that prevented penetration.

SYSTEM SPECS	
LENGTH	43.75 in
BARREL LENGTH	29.5 in
WEIGHT	8.5 lb
TRIGGER	Straight-pull bolt
SAFETY	Magazine lock-out, trigger block
SIGHTS	None included, Picatinny rail
SYSTEM COST	\$699.99
	as of July 2021

BATTLE LAB

# Battle Lab Technology Expo (BLTx)

## Inaugural BLTx

22–23 May 2023 at NSWC Indian Head and Joint Base Anacostia-Bolling

*Focus: Physical Security and EOD Communities*

*Day 1: Battle Lab Overview Briefs and Vendor-Led Technology Demos*

*Day 2: Project Briefs for Efforts Completed by Battle Lab*

## Provide Operationally Relevant Demonstrations of Cutting-Edge Technology

- 2023 Inaugural Event:
  - Showcase of existing and emerging technologies— all participants surveyed indicated they learned about at least one new technology
  - Cross section of organizations diverse and representative of the Joint EOD and physical security communities
- 2025 Battle Lab Event (March 25-27)
  - Focus: EOD and Physical Security
  - To be added to the invite, email: [bltx@us.navy.mil](mailto:bltx@us.navy.mil) or [Battle Lab@us.navy.mil](mailto:Battle_Lab@us.navy.mil)

(Source: NSWC IHD.)

# Who Is Battle Lab?

- Demonstration and Assessment Team (DAT)
  - Military Utility Assessments of Emerging S&T With Warfighters
- Explosive Detection Equipment (EDE)
  - Evaluation of Systems to Detect or Identify Explosives and Threats
- EOD Technology Assessment (ETA)
  - Evaluation of Emerging and Available Technology for EOD

(Source: NSWC IHD.)

# The Issue Addressed

## The NSWC IHD Battle Lab Impact

### User Experience

### Technical Perspective

**THERE WERE LONG WAIT TIMES FOR NEW EQUIPMENT**

**What can we do to get technology out the door faster?**

**EQUIPMENT DID NOT MEET THE OPERATIONAL NEED**

**How do we better understand the user's requirement?**

**EQUIPMENT DID NOT PERFORM AS EXPECTED**

**How can we communicate the capabilities and limitations of equipment to stakeholders?**

**Current Information on State of Technology to Drive Acquisition Strategies**

**Marriage of the Geek and the Warrior to More Clearly Define Requirements**

**Independent Assessment of Data to All Stakeholders**

# 2025 BLTx

The Naval Surface Warfare Center Indian Head  
**EOD TECHNOLOGY CENTER**  
 invites:

military, government, government support contractors,  
 and state and local law enforcement

## THE BATTLE LAB TECHNOLOGY EXPO

**MARCH 25-27, 2025**

**NSWC IHD STUMP NECK ANNEX**

hosting

Hands-on Operational Demos  
 of Latest Technology Areas for:

*EOD - AT/FP - FIRST RESPONDER  
 PUBLIC SAFETY - PHYSICAL SECURITY*

To be added to the invite, email: [bltx@us.navy.mil](mailto:bltx@us.navy.mil) or [Battle\\_Lab@us.navy.mil](mailto:Battle_Lab@us.navy.mil)

(Source: NSWC IHD.)
